50X1-HUM

1. Professor Dr. Helmut Frieser of the Technical High School of Dresden was taken to the USSR in spite of his advanced age at the end of April. He was a specialist in the examination of waste gasses on the A-4. No news has been received from him since his deportation.

50X1-HUM

2. Prof. Dr. Luske, formerly of the Physikalisches Institut, University of Rostock, an experimental physicist specializing in supersonics and the underwater transmission of sound, was deported to Russia by air in October 1946. He was first in Moscow but has since been reported at Oranienbaum near Leningrad. A research laboratory in which he would have been interested was to have been built in Sestroretsk but the project has been abandoned.

50X1-HUM

3. The Soviets are telling the German technicians now working in the USSR that they need only sign contracts for two and one half years' work in the USSR, subject to satisfactory progress in research and development, after which period they would be permitted to return to Germany. It appears that this assurance is generally believed, so that the Soviets will probably achieve their purpose in gaining more enthusiastic cooperation from the Germans.

Prof. Dr. Schuetz, an experimental physicist at the University of Kaliningrad (Koenigsberg), who later studied spectroscopy in Jena and took part in the development of the A-4, was deported from Jena in October 1946.

he was in a settlement near Moscow to the east, and that for lack of other employment he and Schuetz were giving lessons to the children of German scientists and technicians.

he was on an island not far east of Moscow.

50X1-HUM

who looks after the welfare of the German scientists in the USSR and has his office in Karlshorst, mentioned that Dr. Fenner, former specialist on infra-red image tubes at the Oberspreewerke, Berlin, was in the USSR.

6. During June letters were received by engineers at the Oberspreewerke, Berlin, from former colleagues now in the USSR which give their latest locations as follows:

At the Svetlana Works, Leningrad:

work on cathodes is being planned 50X1-HUM

since 28 December 1946 they 50X1-HUM

have been making small tubes for impulse pur-
poses, together with Dr. Grosse and Ueberrueck
mentioned above.

Departed from Leningrad for Moscow or Gorki:

Dr. Schuttlöffel

Rebeck (Sic)

At Gorki:

Dr. Hasselback

✓ Prof. Dr. Theodor Schmidt: A theoretical physicist of the University
of Greifswald. A spectroscopist who worked on the quadrupole moment
of atomic nuclei, Schmidt was ordered to Moscow in September 1946.

50X1-HUM

8. Prof. Gustav Hertz: stated

that a large house was being built for him and that
he was learning Russian, that Professors Vollmer and von Ardenne 50X1-HUM
paid occasional visits, and that he was not permitted to leave the
neighborhood of his home.

9. Dr. Mollwo (Sic): Mollwo was deported with his family to the USSR
on 22 October 1946 from the Physikalisch Technische Reichsanstalt
in Weida, Thuringia. He is believed to be on the Black Sea coast,
while his family is in the neighborhood of Moscow.

10. Dr. Weiss: A former director of the Radium Laboratory of the 50X1-HUM
Physikalisch Technische Reichsanstalt who went willingly to the USSR
and persuaded his colleagues Drs. Westmeyer and Schaffers to accompany
him.

11. Dr. habil. H. Dunken: Dunken, formerly of the University
of Halle, allowed himself to be recruited for research work
by the Siebelwerke Halle, and was thence deported to the USSR.

12. (Prof. Dr. Rieche: Rieche is a specialist in hydrogen peroxide,
formerly of I.G. Farbenindustrie AG, and has been in the
USSR for some time.)
